

Trần Minh Tuấn

Cyber Security Student

Education

2021 - 2025, Ha Noi University of Science and Technology

BS in Cyber Security

To learn and apply knowledge related to information security, such as Database, Computer Network and Machine Learning, that can be utilized in practical exercises during the learning process.

Experience

November 2022 - March 2023, Internship, National Cyber Security Center

Detailed achievements:

- Complete 90% tasks Python Programming Language in Hackerrank platform and done tests
- Complete 70% tasks C/C++ Programming Language in Hackerrank platform

Personal Project

[Hugo website](#)

- A website build using SCSS and HTML to showcase detailed information and projects completed

Software Development Skills

[Programming](#)

- Java
- C
- Shell
- Assembly
- Python
- Kotlin

[Computer Software](#)

- MySQL
- SQL Server
- Android

Certificate

[HackerRank](#)

- SQL (Basic, Intermediate, Advanced)
- Python (Basic)

[Google](#)

- Crash Course on Python

Objective

My career objective is to become an expert software engineering in the field of information security. I constantly strive to listen and learn from those who came before me to enhance both my technical (research and practical) and soft skills. In the future, I aim to pursue further studies abroad to further develop myself and stay updated with the latest knowledge in the industry and profession.
